PROFESSIONAL SUMMARY

Software Engineer with **3+ years** of experience building production mobile and web applications with **React Native, React, Next.js, and TypeScript**. Delivered cross-platform apps, responsive web products, and **multi-role business platforms** across education, healthcare, insurance, travel, and workforce management. Experienced in **frontend leadership, real-time features** (sockets, video calling, live streaming), payments, **offline-capable workflows**, and **AI-assisted application integrations**. Hands-on with **App Store and Google Play deployment** and **React Native version upgrades and dependency conflict resolution**.

EXPERIENCE

Independent Product Developer (Remote Client Collaboration)

May 2026 – Present

K&M Productions

Kaido | Frontend, Backend contribution

- **Led complete frontend development**, including responsive UI and frontend architecture, working directly with the client, and contributed to backend implementation.
- Shipped an **AI-assisted property media product**: image and media upload, content analysis, video assembly, animated styles and transitions, configurable forms, clip review and approval, **multi-role permissions**, and **billing**.

Software Engineer

February 2026 – May 2026

DEVFIED

TUDU | React Native

Mobile learning product for YKS, TYT, and AYT exam preparation with **200K+ downloads**.

- Built **responsive interfaces for phone, tablet, and iPad** across teacher, mentor, student, and parent roles.
- Implemented question solving, explanations, and study planning flows.
- Developed **multi-document PDF workflows** with writing, drawing, and annotation.

React Native Developer / Mobile App Developer / Web Developer

July 2023 – February 2026

Brackets Private Limited

Production work across mobile and web: frontend leadership, multi-role operations, healthcare communication, and AI-assisted application workflows.

- **Deployed applications to the App Store and Google Play.**
- Resolved **React Native version conflicts**, performed **version upgrades and downgrades**, and managed **package requirements**.

Cairasu – Frontend Lead | React Native, Next.js

- **Led the frontend, owned the caregiver mobile app**, and worked across the **multi-role web UI**.
- Delivered **attendance (including offline capture)**, location tracking, scheduling, payroll, requests, role-based access, push notifications, and **centralized sync** for admin, staff, client, and caregiver workflows.

DERMEEZ | React Native, Jitsi

- Built patient submission and doctor review for a dermatology app: multiple photo uploads, medical history, treatment instructions, and **in-app audio and video calls**.

BoltIQ | Web application, API integration

- Integrated the **BoltIQ API**, audio, **chunked and streaming responses**, and web notifications into a doctor and patient workflow where AI assists analysis and the doctor evaluates and responds.

Brackets Team | React Native, Firebase

- Built attendance, payroll, employee requests, **biometric authentication**, push notifications, themes, animations, and gesture interactions.

Eflea | React Native, Firebase, Smartwatch

- Connected smartwatch health signals (blood pressure, SpO2), live location, **geofencing**, **fall detection**, **SOS**, video calling, and chat.

Veronica's Insurance | React Native, Firebase, Stripe

- Built mobile coverage, quote, and payment flows with **Stripe**, audio recordings, push notifications, and custom UI components.

Tour 27 | React Native, Node.js/NestJS, Firebase, Agora

- Built virtual tour booking and live sessions: Google authentication, scheduling, sockets, **Agora streaming**, Firebase sync, and camera and zoom controls.

React Native Intern

June 2023

Software Alliance

- Started professional mobile application development with React Native.

PROJECTS

Save-e App – Load Monitoring System

Final Year Project

Gift University | IoT, Machine Learning, Real-time Monitoring

- Built an **IoT-based, real-time device and app** that measures electrical parameters from a **dual single-phase energy meter**.
- Added **ML-based unit prediction** to forecast energy consumption.
- Implemented **custom alarms** based on unit consumption, **bill viewing**, **real-time alerts for voltage fluctuation**, and **live graphs**.

SKILLS

Frontend and Mobile: React, React Native, Next.js, TypeScript, JavaScript, Responsive Design

Backend and State: Node.js, NestJS, Express, Firebase, Redux, Redux Toolkit, Authentication

Integrations: REST APIs, AI/API Integrations, Google Maps, Stripe, Jitsi, Agora, WebSockets, Real-time Systems, IoT

Release and Maintenance: **App Store and Google Play deployment**, **React Native version upgrades and downgrades**, package and dependency conflict resolution

Tools and Practices: Git, GitHub, Pull Requests, Frontend Architecture

EDUCATION

BS Software Engineering

Batch March 2019

Gift University | GPA 3.21
